

# BURGERS

Learning Objective:

To be able to plan and design a burger to make.

What have you  
learnt about burgers  
so far from these  
lessons?  
Tell a friend what  
you know!

What  
new cooking skills  
have you learnt so far  
in these lessons?  
Do you know how to  
match some flavours  
together?

Today you will be planning and designing your own burger to make in the next lesson.

You will need to think about the type of bun, patty, the layers, sauces and a side dish.

Unfortunately, you will just make the burger next lesson and not the side dish.

Do you  
remember which  
patty was voted  
the favourite in  
lesson two?

Your teacher  
will provide the  
ingredients to  
make this patty.  
Your patty will  
be the same as  
everyone else's.  
This will make  
things easier  
for your class.

As a class, list the ingredients and things your teacher will provide for you.

A large, empty white rectangular box with a black border, intended for students to write their list of ingredients and items provided by the teacher.

Write a list of things you may need to bring from home to make your burger.

You can design and make your burger with a partner. Discuss with your teacher if you want to work with a partner so he/she can organise the correct ingredients.

Now you can design your burger.  
Fill in the design template. Think  
carefully about the flavours and  
ingredients you want to use.

Have fun!

Plenary

Does anyone want to share their design with the class?

What will be the hardest step when making your burger?

What will you need help with?

What will you do if something in your plan doesn't work out?
