

**Name**

**Science investigation planning sheet**

What do you want to find out?

Before you get started think about ...

Which **variable** will you **change**?

Which **variables** will you keep the **same**?

Which **variable** will you **measure** or **observe**?

What will you use to measure or observe this?

What will you do? This is your **method**.

How will you make sure it's a **fair test**?

What **equipment** will you need?

What do you think will happen? This is your **prediction**.
